

CITY BRIEFS.

CITY BRIEFS.

Cottages of Newport and Newporters.

The steam roller has been doing duty
Touro street this week.

Cyrus W. Field of New York has
rented one of the Livingston cottages
the Cliffs for the coming season.

Smith Cliff of New York has taken
an ex-Governor Carroll cottage on
my street for the season.

Newport's apology for a City Hall is
receiving the repairs ordered by the
City Council at its last meeting.

John McAdam of Princeton college
is spending his vacation with his
parents in this city.

Capt. S. A. Gardner of New London
has been visiting friends in Newport
this week.

Schoolship New Hampshire received

innescota Tuesday.

Mr. and Mrs. Frank W. Andrews of
Ostrum will occupy their villa near Cod-
dington Point this season.

The shady side of the street is becom-
ing the most popular for noon-day pe-
destrians.

Mrs. P. A. Stockton of Brookline,
Mass., has taken possession of her cot-
tage on Bellevue avenue for the season.

John B. Doris and his great Inter-
comedian show are billed for Newport on
June 4.

Rentals for the season have been nu-
merous this week and the real estate
agents are happy in consequence.

Dr. N. G. Stanton, of Stanton &
Baker, has been elected from his position

pen in Bermuda.

H. J. MacKenzie of Boston has leased of Mrs. Burleighshaw her cottage on Toward avenue for one year.

Mrs. E. C. Tenney has rented her cottage on Pellham street to Miss Sarah Lord of New York for the season.

Allen Weaver has become a patrolman on the Newport police force in place of officer Kiug resigned.

Mrs. John O'Brien of New York has rented her cottage on Bellevue avenue to Chas. C. Pomeroy of New York for the season.

Geo. C. Mason has rented his cottage on Francis and Redwood streets to Gen. James B. Fry of New York for the sea-

Daniel Watson has rented the Professor Eustis cottage on Wolcott avenue, Jamestown, to John Struthers of Philadelphia for the season.

The heirs of the late F. V. Gilman have received his \$2000 bequest as member of Newport Associates No. 4, N. M. R. A.

The members of the Newport Artillery Company will hold a social at their armory on Clark street Monday evening.

A social and dance is to be given in Odd Fellows' Hall Monday evening by the local division of the Ancient Order of Hibernians.

Mrs. Gen. Deans of New York has rented her cottage on Easton's Point to Jonathan Evans of Philadelphia for the season.

Workmen are said to have plied their tools throughout the day Sunday on the Fiske villa now being built on Ochre Point.

The selection of Mr. James C. Swan for president of the Board of Trustees of Long Wharf and Public School property in place of Wm. E. Crandall deceased, is a good one.

President F. G. Harris, Vice President John Gilpin and other officers and members of Roger Williams Lodge No. 104, Sons of St. George, paid a fraternal visit to Fall River last evening.

Capt. J. W. Downing of New York

has been in town this week, and though greatly improved in health shows the severe illness which he has suffered during the winter.

At the next regular monthly meeting of the Newport Artillery Company will occur the annual election of officers. The meeting will be held at the Armory Tuesday evening.

Miss Julia Anderson, who has been spending a brief rest with her sister in this city, left Sunday evening for New York to join "Only a Farmer's Daughter" company in which she is to play the role of Madame Lerant.

The Nichols house on Marlboro street, corner of Farewell, has received a new front to its lower story this week. This is one of Newport's most ancient landmarks, it having been erected about the year 1700.

Mr. William W. Bradley, for many years the machinist at the Torpedo Station, has been transferred to the Washington navy yard and his family have taken up their residence in Washington, which place they left to come here.

(For additional locals see 4th page.)

for Aunt Trudy's home lacked nothing but inmates, and seemed like a "heavy-

"only mansion" to the poor outcast.

"The hardest of all," said he in the evening, when telling her why he left his place, "was at Christmas, when the house was full of children and company, and I had such a lot of fine and good things—sweets and such like—temptations—like my mother used to make for me; and they would make fun of my poor clothes until I'd stay in my bedroom, or out on the back porch and shake with the cold, so others than stay with them by the fire."

"Are you fellows in your club rough, sweating boys?"

"Yes, ma'am, they swear awfully."

"I hope you don't do that."

"No, ma'am;—only when a fellow's with them he's got to a little, or he'll get called names he don't care about."

"Then, speak, you could not bear to hear them speak of your mother in the vile way they speak of God! Is not our Heav'nly Father far dearer to us than even our mother?"

"I understand how Christian men can laugh at the daring oaths of wicked men, as I

"To church! I reckon we rough fellows would make perty shows there among the laces and ruffles! Reckon a feller would feel fine in such a grand place in his ragged shoes and greasy clothes; and how's he going to get his things washed and mended, when he's got no mother?"

The new preacher, who had been brought tears to Aunt Trudy's eyes, so she could not speak, and Charlie went on: "Believe the fellows would about soon go into the fire as to go near them fine churches!"

"How are we to do?"

"'I'll tell you about one thing that used to make some of the fellers knock under; I used to stand it pretty well till I got off alone, and then I'd bawl like a baby!' It was down at a deep cut a lot of us fellers was a diggin' out last summer. A little girl would come out there sometimes and sit not far from me, and she'd cry out the sweetest once-and-a-sometimes she would give the men books and tracts, and she had such a pretty face and sweet voice they couldn't swear at her, though some couldn't read her books. Lots of 'em said they learned more Bible from her than they ever did from preachers."

Long after Aunt Trudy retired she studied and planned how to tame her little A. J. and she had laugh at him. She resolved to give him a Christmas toy, and invite some of the nicest boys of her acquaintance to spend it with him. There wasn't time now to knit scarfs and mittens, but there was just as pretty ones at the stores, so early the next morning she took her basket and went to market, leaving Charlie in charge of the house and chores. She was afraid he might leave in absence, but could not arrange otherwise. The cut and many other things she purchased on credit.

tion that they could be returned if he did not stay. She also secured a good place for him in a store of a friend, where she was assured he would receive good treatment as well as good wages. Greatly to her relief she saw him hurrying out to help her with her bundles as the hackman let her out at the gate. Poor Charlie was just child enough to cry over his good fortune, when she told him about the situation and that he could board with her for charge if he would do the chores in bad weather. He tried to express his thankfulness for the gifts and the "Christmas" promised by declaring he would take care of her as long as she lived.

After putting away her purchases Aunt Trudy sat down to run over the news in the morning paper, reading items aloud; among others an account of the arrest of three burglars, who had broken into a store when she was startled by an exclamation from Charlie, and noticed his face as pale as ashes: "That's what you've saved me from, Aunt Trudy! That was our special meetin'!"

Living Lunch Baskets.

A writer in Harper's Young People gives the following interesting account of a few animals that have curious ways of carrying about their food:

Of course it is not at all surprising that you should carry your lunch with you when you are going to be away from home all day, but think of an animal doing such a thing!

For instance, for instance. Everybody knows it carries its drinking water with it, but it does more; it carries its lunch, too. That bump on the camel's back is not a curvature of the spine, as it may seem, but a mass

of fatty material. That hump, in fact, is the camel's lunch basket.

When a well-fed, healthy camel starts out on a journey across the desert, its water-pouch is full and its hump is big. When water fails, the camel has only to draw on its reservoir, and, when food is wanting, the hump is called upon.

Not that the camel helps itself to bites of its hump. That would be a decidedly uncomfortable way of getting a meal, and very likely the camel would rather go hungry than to do that. In some way the hump is gradually absorbed, and, for a long time after the camel has been unable to find anything to eat, it can get along very comfortably on what its hump supplies.

By and by, of course, the hump is used up and the camel, though still strong, is

A great deal more like a genuine lunch basket is the bag the pelican carries to feed in. The pelican is about as ungainly and odd a bird as can be found, and yet is a very interesting one. It has great webbed feet, short legs, big body, huge wings, and an enormous head.

Its head is mostly bill, and on the under part of the bill is a fleshy bag made of tough skin. This bag can stretch and stretch until it can hold an incredible quantity of fish, for it is in this way that the pelican puts the fish it catches for its food. When the bag is full, the pelican rises heavily from the sea, and with broad sweeps of its great wings, flaps slowly to the shore, where it alights and prepares to enjoy the meal it has earned. One by one the still living fish are tossed into the air, and come down head first into the wide opened mouth of the hungry bird.

A State street merchant put a handsome plaster figure in his store window, and prepared himself to enjoy it with his customers. Alone in the afternoon the wife of an artist came in, and she noticed it at once. "A Mr. B." she said, "that's a handsome figure in your window." "Yes," replied the merchant, "I call it so myself I do." "Your taste is excellent," pursued the lady, "and I'm glad to see a love of art developing in Philadelphia circles. What is the figure—Hehe?" "Oh, no, ma'am it's plaster of Paris."

Father, stalling down town—"Yes, Robert, my son, keep in mind what your mother says, and always say please. Though a little word, it indicates the gentleman. Here, wife, hold my overcoat and hat; be quick about it."

G. A. Weaver's Column.

THE PLANET JR.
HORSE HOE

It is actually worth more than ten men in the field. It takes from the hill, it cuts, it cuts, it cuts. What more can you ask the horse to do? It is in your Mowing Machine for you to have them ready for the early season, and when you buy don't fail to see the

STEEL
Champion Mower

Something new, as will apply the last invention to your old Mower, which will save one-third the draft, take the position of the pulley and have them ready for the early season, and when you buy don't fail to see the

Tiger, Thomas, Champion and Ohio Rakes.

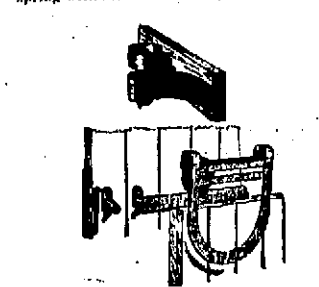

Bullard, American and Thomas Tedders.

—USE THE—
SPRING Whimtree

On Mow, Harrow, Horsehoe, Wagon, or in fact anywhere you use a horse. Hang your door with

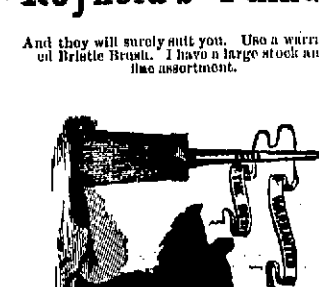

LANE'S
DOOR HANGERS,

And they will please you. They are all steel, no joints, need no nailing, run easy and never spring with the heaviest door.

Reynold's Paints,

And they will surely suit you. Use a warrant of Bristol Brand. I have a large stock and fine assortment.

RUBBER HOSE.

8000 ft. sold in 1885.

A large stock for this year and every foot warranted. Don't buy until you get my price and see my goods.

PERFECTION
Refrigerators.

I have put in a stock of these, believing them to be the best made. They are made of solid ash, trimmed with cherry, and are an ornament to any room. The circulation of air is so arranged that you can keep all kinds of food in the same box and one will not take the taste of another, superior in construction to any Refrigerator made. Prices low.

Window Screens, Screen Doors, Screen Wire, Poultry Netting and Supplies, Lawn Mowers.

SEE THE PHILADELPHIA,

as it was never made before. It will be more durable than ever, using a spring pawl which is more effective than a silent or slide Lock Pawl.

Shovels, Spades, Forks, Rakes, Wooden Ware, Hardware, &c.,

At the only complete Implement and Hardware store in the city.

19 and 23 Broadway,

OPERA HOUSE
MONDAY, APRIL 26.

Joseph J. Dowling

Miss Sadie Haddon,

In E. A. Locke's New American Melodrama,

Nobody's Claim.

The latest and greatest New York success, universally pronounced by press and public the best American play yet written. Perfectly interpreted by a selected company of Metropolitan artists. In order to add to the musical features of the entertainment, we take pleasure in presenting for the first time our Silver Cornet Band and Concert Orchestra, an organization of picked soloists.

Manager for the Evening, Wm. C. Cameron. Seats can now be secured without extra charge. No advance in prices.

On Tuesday April 27, Miss Carrie Smith in Jack-in-the-box.

On Wednesday April 28, Miss Carrie Smith in Jack-in-the-box.

On Thursday April 29, Miss Carrie Smith in Jack-in-the-box.

Hambletonian Stallion

HERCULES

Will make the season of 1886 at the stable of George N. Littleton, West Broadway, Newport, R. I. Hercules was foaled May 1, 1882. He is four years old, stands sixteen inches high, weighs 1000 lbs. He is of a bright bay color, with a white coat, smooth and glossy, with black points. He is naturally a good fast horse, shows great muscular power in his gait and no doubt but will make a very fast horse.

PEDIGREE OF HERCULES.

Hercules by Redwood, by Columbus Hambletonian with a record of 2:22. He by Ajax, by Rymyke Hambletonian, dam of Hercules by Jay Gould, granddam an imported thoroughbred mare, dam of Redwood by Alexander Abdiel, dam of Columbus Hambletonian, Orphan Girl by Young Columbus.

For any further particulars inquire of GEORGE N. LITTLETON, or JOSEPH S. ANTHONY, 527-530.

Standard Bred Stallion

"LIGHTNING."

Registered Number 2149.

WILL MAKE the season of 1886 at the farm of the proprietor, Lightning was foaled May 11th, 1882, and sired by Almont Lightning, one of the best sons of the noted Almont, out of a daughter of Almont. He was raised by Gen. Wm. T. Withers at Fairview, Lexington, Kentucky. Is a very handsome well finished colt of very pleasant disposition in of a bright bay color with black points, with a small star in forehead with a very narrow blaze in face, has not been trained for speed but ought to trot fast and produce trotters. Terms \$25.00 payable at time of service. Mare not proving with foal can be returned next season free, if the horse is alive and owned by me.

Farm and Family

The Bees in Spring.

In order to take full advantage of the season, the beekeepers must commence work in the spring with the bees, and keep up with them until such time as we have them in the best condition to do the work as we want it done. Our first aim should be to get as many bees as possible ready for the harvest when it comes. Then to have the frames well filled with brood that there will be but little space left in which honey can be stored below.

There will always be plenty for the immediate want of the bees, and as the season advances brood rearing will gradually cease and the combs be filled with honey, leaving plenty for winter stores. Just as soon as the weather will permit, overhaul the hives and remove a part of the brood frames, just how much of brood to remove will be determined by the strength of the colony. We use ten frames. We usually leave five frames at the start, but if the colony be a little weak we reduce to four. This calls into use the division board, without which no work of this kind can be done. In preparing the brood chamber in this manner we endeavor to leave frames that contain as much honey as possible, but at times the brood already in the combs may interfere with this arrangement to some extent. If such be the case, several frames which contain honey should be left in the chamber just outside the division board and the bees will carry the honey around into the brood chamber. Our object in confining the bees to the limited number of combs is to force the queen to fill these frames quite full of brood, and give the bees so long as she has combs empty combs, in which to deposit eggs, they will need no additional combs even though the bees become a bit crowded, in fact they are better so.

The frames removed from the hives should be assorted and stored, those containing the most honey where they can be reached first, as in building up colonies in the early spring, the first colonies build up very slowly at the beginning and no spreading of brood can be safely done until all danger of cold weather is over. If appearance would indicate the need of more brood before this, an additional comb should be added at the side. —Indiana Farmer.

Poultry Hints.

The comb is a good indication of a fowl's health, says the Poultry Monthly. If she is in good healthy condition her comb will be a bright red; if otherwise her comb will be of a pale color. Give variety of food, a warm breakfast, meat quite often, with wheat screenings and the like, cayenne pepper mixed with the soft food gives them in excellent. Do not feed too much corn to laying fowls, as it is very fattening. Look over your flock of chickens and pick out the culls, keep only the best birds for breeding, select your finest cockerels now and market the rest. A little wheat should be spared daily for the growing chicks. Nothing will bring the pullets to early laying better than wheat. Feed generously. Do not forget to feed the chicks with ground bone, oyster shells and an occasional feed of meat. Boil the small potatoes or other vegetables mixed with bran, adding a dash of red pepper and salt every few days. Ginger and sulphur may be fed in soft feed occasionally. Milk in some form is a necessity for little chicks. Keep the poultry house as even place about it thoroughly clean. Above all things, keep the fowls dry. Do not allow them to be afraid of you. Cultivate their acquaintance. If your chicks live and six months old are dropping and dying from no apparent cause, they are probably suffering from distemper, which generally occurs between the twentieth and twenty-sixth weeks of life in the different breeds. Put bromide of potassium in the drinking water in the proportion of two grains per quart, and just the quantity of water so that all the water will be drunk in one day. Do this every alternate three days until twelve days have elapsed and you will probably find the trouble has disappeared.

The True Butter Cross.

Professor Thomas Taylor has at length made a minute report of his experiments in testing butter and oleomargarine. He has analyzed specimens of both, treated them with acids, and produced crystals of true butter, of hard and of soft.

These he examined under the microscope. He subjects them to polarized light. Under this test the hard and the soft butter invariably show prismatic colors, while the butter shows none. This he considers his surest test. Examined under the microscope, also the butter crystals he declares invariably show upon the surface a black St. Andrew's cross, which the crystals of hard and soft do not show. He repeats these statements emphatically and decidedly, giving them as the summing up of a month's careful investigation.

Thus it seems that any chemist who has a microscope with a glass attachment will be able to distinguish butter from oleomargarine. This may be considered an important discovery.

How to Make Hot Beds.

When hot beds are desired only for a few flowers and vegetables for home use, the frame may be made movable. Dig a bed six feet wide, two feet or more deep, and of any length desired. Lay the bottom of this bed and drive down a stake of iron, corner, to which nail cheap boards. Make the frames twelve feet in length by five feet ten inches in width, so that a sash three feet by six may be used. The manure used for hot beds should be fresh and well worked, removing all coarse litter. If a small hot-bed, and the owner does not care to go to the expense of sash, then unbleached cotton cloth, oiled, will answer the purpose, and if the bed is built at farm location is nearly as effective as glass. Lay unbleached cotton cloth and oil with linseed oil on one side. Tack on a light frame with the oil side up. These frames are much lighter than glass sash, and will be found very desirable in small gardens.

Cheap Eggs.

The usual spring plethora of eggs is now beginning to make itself manifest, and the consequence is that they are becoming cheaper day by day. The average price for choice stock at wholesale last week was twelve and one-half to thirteen cents. Sixty millions of eggs were received in this city during the past two weeks. The prospects are that there will be a greater abundance of eggs and that they will be cheaper than usual at this season of the year. The reason given for this is that in consequence of the cheapness of grain for several years past the propagation of fowls has largely increased. Every year the south is extending its business and increasing its shipment, and to-day Virginia, Georgia and Tennessee are sending largely to this market. —New York News.

Agricultural Notes and Hints.

Stumps are a great nuisance on land that is cultivated. Now, while the ground is soft, is a good time to twist them out by horse power, chaining a long pole to the stump.

A farmer of experience in wool growing says that there is more money in growing wool at even twenty cents a pound than in loaning money at ten per cent. interest.

The shepherd should breed for size, weight of fleece, evenness of distribution over the body, for length of staple and firmness, for vigor, healthfulness and constitution, and as a result he will soon have a flock of large, thrifty sheep, which will yield him each season fleeces of highest merit.

In nothing do we need to exercise greater care and judgment than in feeding. While one cow will only fully utilize from four to six pounds, a careful test will no doubt prove the cow that consumes ten pounds will bring to her owner a larger net profit than the cow that consumes but five pounds.

The cross-bred flock is often larger than any of the breeds of true blood stock. The prizes for dressed poultry in England have often been won by cross-bred birds, just as in the race of cattle, mongrel steers frequently carry away the prize for the fastest weight. Blood from pure varieties, however, was used in making the cross always.

Diversified farming means fields of grain, meadows and pasture; a kitchen garden and orchard; a lawn with trees and flowers; breeding mares and milch cows; sheep, swine and poultry. Live stock in a farm is the best soil for the soil. Get that which is superior in all the departments. From the best is where the profit comes in.

In portions of the country where butter is made in quantities it is usual to keep one cow with pigs. If she is a good cow the skim milk she furnishes will make the framework of the growing pigs as no other feed can. With this to give the pigs a start they can be kept in thrifty condition on grass or clover with a little grain until ready to put up to fatten in an orchard.

Pigs will learn their way eating fallen fruit, and thus destroying injurious insects. By this practice the value of the pork may be all credited to the milk.

In selecting varieties of cabbage for the farm gardens, the Savoy—the curled and crinkled leaf kind—should not be neglected. It is the sweetest and tenderest variety of this useful vegetable, and also one of the hardiest, being able to remain under the snows of winter unharmed, and when dug out may be dug out fresh and green and sweetened by the exposure. The flesh of a Savoy cabbage thus kept is as sweet as the heart of a cauliflower, and this kind is as easily raised as any other. It may be planted from early spring until July for the last crop.

There are several kinds of Savoys, but no one has decided yet which is the best, and for our own use we get a little seed of each kind and mix them and sow them all at once, and set the plants out indiscriminately.

Household Hints.

To remove white spots from tables or other furniture, rub the spots with camphor, and they will disappear.

To remove ink stains, wash the cloth thoroughly in milk, then in hot water with soap, and the stains will disappear.

A little borax put in the water in which scarlet napkins and red bordered towels are to be washed will prevent them from fading.

A cement made by dissolving rubber cut fine in benzine, may be used to mend rubber boots and shoes. This cement will firmly fasten on the rubber patch.

If one ounce of powdered gum tragacanth be mixed in the white of six eggs, well beaten, and applied to a window, it will prevent the rays of the sun from penetrating.

Articles of a delicate blue that must be washed are often ruined in the process; this may be avoided by adding an ounce of sugar of lead to a pailful of water, and letting the article lie in this for an hour and a half or even for two hours; let it dry then, after which it may be washed without injury. This is said to be a perfect remedy for the trouble referred to.

In this changeable season, when coughs are heard on every side, the following beverage is something if taken just before going to bed by the person troubled with a cough. It is an old French recipe, and is called *lait de poule*. Mix the yolk of one egg thoroughly with a teaspoonful of sugar, and add a few drops of orange flower water. Pour a gill of boiling water by degrees upon the mixture, stirring constantly, and drink very warm.

Never put a particle of soap about your silver if you would have it retain its original luster. When it wants polishing, take a piece of soft leather and whiting and rub hard. The proprietor of one of the oldest silver establishments in the city of Philadelphia says that "housekeepers ruin their silver by washing in soap suds, as it makes it look like pewter."

Black kids may be nicely freshened by putting upon the hands, dipping the fingers in a saucer with good black ink turned in it, and then rubbing the gloves till all the parts are touched, allowing them to dry upon the hands, and perhaps touching them in a bit of this mud to give them luster. A touch of good black ketchup may also be used with good effect for black or very dark colors of gloves.

ICE IN SICKNESS.—Water cannot satisfy the thirst which attends cholera, dysentery, diarrhoea and some other forms of disease; in fact, drinking cold water seems to increase the thirst and induce other disagreeable sensations, but this thirst will be perfectly and pleasantly satisfied by eating comparatively small amount of ice, allowing it in as large pieces as practicable and as much as is wanted.

How to Cure Freckles.—M. Halpin, in the *Annales de la Société Médico-Chirurgicale de Liege*, recommends the following process for curing freckles: After the skin has been well washed and dried, the folds of the skin are drawn out with the left hand, and with the right, carbolic acid is painted on the freckle and allowed to dry. During some days the spots appear more evident than before the application of the acid, and a kind of erythema or scale is formed. In seven or eight days the scale falls off; the skin thus exposed is of a rose color, but afterwards becomes white.

To Prevent the Damages of MOTHS.—Furs, fannels and lincolns, when laid by for any time, are very liable to injury from moths. Most persons may have noticed at times in their houses a small, light brown-colored moth, and another with black and white wings; both these are very dangerous insects. Whenever they are seen, they should be destroyed. But no articles of fur, fannel and woolen fabric should be left long without being taken out and washed and aired. They should always be well aired before they are put away. If a few bits

of fur, fannel and lincolns, when laid by for any time, are very liable to injury from moths. Most persons may have noticed at times in their houses a small, light brown-colored moth, and another with black and white wings; both these are very dangerous insects. Whenever they are seen, they should be destroyed. But no articles of fur, fannel and woolen fabric should be left long without being taken out and washed and aired. Whenever they are seen, they should be destroyed. But no articles of fur, fannel and woolen fabric should be left long without being taken out and washed and aired. They should always be well aired before they are put away. If a few bits

ter apples, which can be bought at the chemist's, are enclosed in muslin bags, and put into the drawers or closets, no moth will ever come near them.

VOLATILE SOAP FOR REMOVING PAINT, GREASE SPOTS, ETC.—Four tablespoonfuls of spirits of hartshorn, four tablespoonfuls of alcohol, and a tablespoonful of salt. Shake the whole well together in a bottle, and apply with a sponge or brush.

Tar Smoke for Diphtheria.

A correspondent who has read with sadness the accounts of mortality among children in this section from diphtheria sends us the prescription and treatment of Dr. Dethilh, of Paris, which has proved very successful. The process is thus described: Pour equal parts of turpentine and liquid tar into a tin can of tin and set fire to it. When a dense resinous smoke arises, which obscures the air of the room. The patient immediately seems to experience relief; the choking and rattle stop; the patient falls into a slumber and seems to inhale the smoke with pleasure. The fibrinous membrane soon becomes detached, and the patient coughs up microbes. In the course of three days afterwards the patient recovers. —[Salem, N. J., National Standard.]

Recipes for the Table.

WHITE SPONGE CAKE.—Whites of ten eggs, one and one-half tumblerfuls of sugar, one tumblerful of flour and one teaspoonful cream tartar.

COGNAC.—One and a half cups of sugar, one cup of sour milk, a small piece of lard, two eggs, one teaspoonful of yeast powder, salt and cinnamon, flour enough to mix.

SNOODERS.—One cup of butter, two cups of sugar, whites of five eggs, one small cup of milk, three full cups of prepared flour, vanilla and nutmeg; bake in small round tins. Those in the shape of fluted shells are very pretty.

FRUIT COOKIES.—One and one-half cups sugar, one-half cup butter, two eggs, one and one-half cups chopped raisins, one-quarter cup currants, one-half teaspoon cinnamon, cloves and allspice, one teaspoon nutmeg, one-half cup of milk, flour to roll. Cut in thin cakes.

COCONUT COMFITS.—Take equal weights of grated coconut and powdered white sugar; to a pound of coconut and sugar add the whites of six eggs beaten to a stiff froth; these should be eggs enough to wet the whole to a stiff mixture; drop in cakes on buttered paper laid upon tins, and bake in a moderately heated oven.

FIG PUDDING.—Three-quarters of a pound of grated bread, half a pound of best figs, six ounces of sugar, six ounces of moist sugar, a teaspoonful of milk and a little nutmeg grated. The figs and nut must be chopped very fine. Mix the bread and nut first, then the figs, sugar and nutmeg, and egg, beaten well, and lastly the milk. Boil in a mold four hours. To be eaten with sweet sauce.

ROYAL CUSTARDS FOR SOUP.—Two made by mixing the raw yolks of four eggs with a gill of clear soup and a grate of nutmeg; beat the custard well, pour into a shallow oiled dish and set in a pan of hot water, in a moderate oven, to harden; do not let it brown, only become firm enough to cut in strips; cut the custard in small strips or diamonds, and serve in hot clear soup or consommé and serve it.

EGGS AND HAM.—A nice way to serve eggs with broiled ham is to butter some patty tins, sprinkle conscientiously with fine crumbs of bread, break an egg into a saucer, and then, without disturbing the yolk, pour it into the tin. Set the tins into a hot dripping pan and let them stand in the oven until the white is cooked. Then, after putting the thin pieces of nicely broiled ham up in a hot platter, take the eggs from the pan and turn out on the ham. It is not necessary to close the oven door while the eggs are in it, and indeed it is better not to do so.

Fashion's Fancies.

Like in all shades is to be popular for spring dresses.

Skirts of silk and wool broadened have draped of silk or soft cloth.

Broad Chantilly and guipure lace are used for trimming mantes.

Silk or velvet band is used for finishing the edges of tailor-made suits.

Faile Francaise will be much worn for plain as well as elaborate toilettes.

Plain cloth, diagonal and serge for spring tailor-made dresses are of light weight.

Ribbon for tennis costumes and hats has bayadere stripes and golden tennis bats.

Chenille fringes for mantes have wooden spindles tipped with beads, on the strands.

Push bands three inches in width are used for trimming woollen dresses for spring wear.

Mouseline de soie for drapery has pompadour stripes in delicate colors alternating with white.

Happiness

results from that true contentment which indicates perfect health of body and mind. You may possess it, if you will purify and invigorate your blood with Ayer's Sarsaparilla. E. M. Howard, Newport, N. H., writes: "I suffered for years with Scrofulous humors. After using two bottles of Ayer's Sarsaparilla, I

Found

great relief. It has entirely restored me to health." James French, Atchison, Kans., writes: "To all persons suffering from Liver Complaint, I would strongly recommend Ayer's Sarsaparilla. I was afflicted with a disease of the liver for nearly two years, when a friend advised me to take this medicine. It gave prompt relief, and has cured me." Mrs. H. M. Kidder, 41 Dwight st., Boston, Mass., writes: "For several years I have used Ayer's Sarsaparilla in my family. I never feel safe, even

At Home

without it. As a liver medicine and general purifier of the blood, it has no equal." Mrs. A. B. Allen, Waterpocket, Vt., writes: "My youngest child, two years of age, was taken with Bowel Complaint, which we could not cure. We tried many remedies, but he continued to grow worse, and finally became so reduced in flesh that we could only move him upon a pillow. It was suggested by one of the doctors that Scrofula might be the cause of the trouble. We procured a bottle of

AYER'S Sarsaparilla

and commenced giving it to him. It surely worked wonders, for, in a short time, he was completely cured."

Sold by all Druggists.
Price \$1; Six bottles, \$5.
Prepared by Dr. J. C. Ayer & Co., Lowell, Mass., U. S. A.

What there is in a Bottle.

Sufficient to stop in five minutes the smarting, stinging pain of too hot or cold, or to stop the pain as soon as applied.

Abundance to cure a score of colds and the coughing that often leads the way to Consumption. It will, positively, cure a Croup in 15 minutes.

More than enough to save a dozen children Choking with Croup. One minute after the first dose the hardest attack of Croup will be relieved.

Plenty to relieve the oppression and wheezing of the small average case of Asthma. The direct cure of Asthma by this medicine is proven by Dr. Thomas' Electric Oil has as equal as an Asthma Cure.

In the above cases Dr. Thomas' Electric Oil can be relied upon. It has given relief to thousands. Keep it in your house. There is hardly a week of the year it will not be useful.

Ho! for Bargains

To those who have a wish to buy a nice

Baggy, Carryall Cart Rocker-

way, Open Wagon, Hack, Lan-

dan, Sleigh, English Road-cart,

Phaeton!!

Or most anything in the carriage line

Cheap for Cash,

As "the winter of our discon-
tent" is now at hand, as several of my
customers have neglected to come up
with the cash as per agreement long
since made so to do.

I have in stock some very nice

WHITE CHAPED TOP BUGGIES!

Which I will sell now AT COST, as
money is very much wanted to pay my
bills, which will soon be due, and
ought to be paid, like a good citizen.I have several nice EXTENSION
TOP CARRYALLS, on hand which
I will sell very cheap, as this is the
dull season for this style of carriage.I have a few SECOND HAND
COUPE CARRYALLS, with Part-
ition Front, just the carriage for
stormy and cold weather, which will do
the service of a five hundred dollar car-
riage, for less than one-fourth of the
amount.Several SECOND-HAND PHAE-
TON TOP BUGGIES for \$50.00 each
and upwards. Also a few SLEIGHS
and PUNGS, CHEAP. It will soon
be time to use them, and you had better
get ready in time, for the Good Book
says: "Be ye ready always." Wish
I could say as much. Now come up and
I will tell you the most good. We also do
all kinds of

Carriage Painting,

at as low rates as it can be done, and
warrant the stock and labor to be
FIRST CLASS.

House Painting,

of all kinds from the largest job to the
smallest, done in the best manner,
and as cheaply as by any of our
friends in the same kind of
business.DON'T WAIT until you want your
house painted, but make the contract
NOW, as by so doing you can SAVE
MONEY, and get better work than by
waiting until the rush comes on, when
every one is red hot with work, and
"don't care whether school keeps or not."To my old customers and cash-paying
friends, God bless you, and I wish you a

Happy and Merry Christmas.

To my friends who have never paid
as they agreed, if they will repent
now, they too will have a MERRY
CHRISTMAS, and I shall have a

MANHOOD

HOW LOST, HOW RESTORED!

Just published, a new edition of Dr. Cul-
verwell's Celebrated Essay, on the radical
cure of Syphilis, Gonorrhea or Seminal Weak-
ness, Involuntary Seminal Losses, Impotency,
Mental and Physical Debility, Impediments to
Marriage, etc., also, CONSTITUTIONAL EX-
HAUSTION, Induced by self-indulgence, or
sexual extravagance, &c. The celebrated an-
thor, in this admirable essay, clearly demon-
strates from a thirty years' successful practice,
that the alarming consequences of self-abuse
may be radically cured, without a single dose
of cure at once, certain, and effectual,
by means of which every sufferer, no matter
what his condition may be, may cure himself
cheaply, privately and thoroughly. The
Lecture should be in the hands of every youth
and every man in the land. Sent under seal,
in a plain envelope, to any address, postpaid,
on receipt of four cents in New postage stamps.

41 Ann Street, New York, N. Y.; Post Office
Box, 450.

Medicine.

For Instant Use

As a reliable remedy, in cases of Croup,
Whooping Cough, or sudden Colds,
and for the prompt relief and cure of
throat and lung diseases, Ayer's Cherry
Pectoral is invaluable. Mrs. E. G. Elderly,
Council Bluffs, Iowa, writes: "I consider
Ayer's Cherry Pectoral a most important
remedy for home use. I have tested its
curative power, in my family, many
times during the past thirty years, and
have never known it to fail. It will re-
lieve the most serious affections of the
throat and lungs, whether in children or
adults." John H. Stoddard, Petersburg,
Va., writes: "I have never found a medi-
cine equal to

AYER'S

Cherry Pectoral

for the prompt relief of throat and lung
diseases peculiar to children. I consider
it an absolute cure for all such affections,
and am never without it in the house."
Mrs. L. E. Herman, 187 Mercer St., Jersey
City, writes: "I have always found
Ayer's Cherry Pectoral useful to my fam-
ily." B. T. Johnson, Mt. Savage, Md.,
writes: "For the speedy cure of sudden
Colds, and for the relief of children afflicted
with Croup, I have never found any-
thing equal to Ayer's Cherry Pectoral. It
is the most potent of all the remedies I
have ever used." W. H. Stokler, Terre
Haute, Ind., writes: "Ayer's Cherry
Pectoral cured my wife of a severe lung
affection, supposed to be Quick Con-
sumption. We now regard the Pectoral
as a household necessity." E. M. Breck-
enridge, Brainerd, Minn., writes: "I
am subject to Bronchitis, and, wherever I
go, am always sure to have a bottle of

Ayer's Cherry Pectoral

with me. It is without a rival for the cure
of bronchial affections."

EASTER SALE

KID GLOVES.

We have this season made large preparations in our Kid Glove Department and are pleased to state that we are now able to exhibit to the ladies of Newport a complete assortment of both unadorned and dressed gloves, in all the latest shades and finish.

Our standard make, the Constance Glove, have been tested now so long by our customers, to their and our own advantage, that we need not speak of their merit, but would call attention to the following special prices during this sale and which are bona fide bargains—

- 10 dozen Kid Gloves at 42 cents.
- 25 dozen Kid Gloves at 62 cents. Gloves sold at \$1 cannot give better satisfaction than these do.
- 15 dozen 4-button embroidered Dogskins at \$1. These are heavier than Kid Gloves but fully as soft and elastic.
- 15 dozen 4-button Undressed, handsomely embroidered in silk stitch back, and the latest novelty at \$1. every pair warranted.
- 25 dozen Mousquetaire Undressed, 75 cents; fully worth \$1.
- 20 dozen Mousquetaire Undressed, extra length, price heretofore \$1.40; during this sale only \$1.20.
- 12 dozen Mousquetaire Undressed, with a new style of silk points, at \$1.50. Every pair warranted.
- One lot Children's Kid Gloves reduced from 75 cents to 50 cents a pair.

Ladies examining our gloves can easily distinguish the difference between them and inferior quality usually offered at low prices.

Newport County News.

MIDDLETOWN.

The first meeting of the Town Council for the present municipal year was held on Monday. The members elect, Messrs. Benjamin W. Ward, William F. Schreier, William F. Schreier, Abraham A. Brown and A. Herbert Ward appeared and were duly sworn by the Town Clerk.

IN COURT OF PROBATE.—An Examination was made of the second account of David Albro, Administrator on the estate of Samuel M. Albro. Wm. Gilpin, Esq., appeared for Etta Albro, one of the heirs of said estate. After the hearing of the Administrator and counsel for said Etta said account was continued to the 3rd Monday of May next. The third and final account of said Administrator with said estate was presented, referred to the same time and notice ordered thereon.

The fifth account of John Maguire with the estate of John C. Barker was examined and passed for record. The second account of Augustus H. Schoeman, guardian with the estate of Emma Lake was examined and continued to the 3rd Monday in May. Charles C. Van Zandt on his petition, was appointed Administrator de bonis non, with will annexed on the estate of Charles Collins and his bond fixed at \$1000.00.

The petition of Benjamin F. Taggart and others for the probate of the will of Sarah A. Weaver and to appoint Joel Peckham, administrator with will annexed on the estate of said Sarah, was referred to the 3rd Monday of May and notice ordered thereon, as was also the first and final account of Abraham A. Brown, administrator on the estate of William C. Brown.

IN TOWN COUNCIL.—The list of persons liable to serve as jurors was examined and corrected, and thereupon Elisha A. Peckham and Anthony M. Kimball were drawn Grand Jurors, and Orrin P. Barker and Robert M. Wetherell were drawn Petit Jurors to serve at the May term of the Court of Common Pleas.

The petition of Thomas J. Gibson et al for the widening of that part of Bliss road, extending westerly from the residence of Francis Talbot to the Newport line was again continued. It was arranged that a meeting with representatives of the City Council of Newport should be had on the road prayed to be widened on Friday the 23rd inst.

Accounts against the town to the amount of \$188.27, were allowed and ordered to be paid from the town treasury. The following named officers were elected:

Town Sealer of Weights and Measures—Gen. A. Brown.
Town Keeper—Clark H. Congdon.
Weighers of Meat Cattle slaughtered for sale—Charles C. Congdon, J. Congdon and Appraisers of Damages done by Fire—Charles H. Ward, Abraham A. Brown and James H. Chase.

Inspector of Petroleum Oils—Felix A. Peckham.
Commissioner of Wrecks and Shipwrecked Goods—J. C. Congdon.
Special Constables—James T. Barker, Freeman Manchester, Alden P. Barker, Melville Bull, Nathaniel L. Champlin and Richard H. Peckham.

Special Constable to prosecute for Violations of the Laws in relation to Birds—Isaac Barker, Philip Mason Beidel and Nathaniel Peckham.
Special Constables for the Arrest and Prosecution of Tramps—James T. Barker, John D. Bliss and Elisha A. Peckham.

Triant Officer—Felix A. Peckham.
Health Officer—Felix A. Peckham.

Conference Sunday was a pleasant day for those who were deprived of the pleasure of attending the services at Brooklyn, yet a large congregation was in attendance at Four Corners. Miss Gifford of the Friends Society of Newport, always a welcome visitor was greeted by her many friends.

Mr. C. H. Congdon and Mr. Jacob Ward, Wm. Slocum were in attendance at the M. E. Conference.

The congregation and members of the M. E. Church are to be congratulated on the selection of their new pastor, Dr. J. W. Willet from Woonsocket, R. I., who has been placed over this church. He has arrived and will be present tomorrow, Easter Sunday and one and all should avail themselves of this time to help swell the numbers and give the pastor a grand welcome.

The Rev. W. A. Wright and family left town on Friday for their new home at Warren. On Thursday evening a social of the church was held at the home of Jason Grinnell when many availed themselves of the privileges of giving a parting shake to the pastor who was present.

Miss Gracie Ward, little daughter of C. H. Ward Esq., celebrated her sixteenth birthday at home on Wednesday evening. A large number of friends were present both young and old.

The Trial Justice of the town has not resigned his Judgeship and will be at the Town Hall on the first Monday of the coming month as usual.

PORTSMOUTH.

Master Abner Potter, son of Counsellman Henry Anthony, met with quite a serious accident on Sunday morning last, by cutting his knee with a hay knife while he was in the barn loft. Dr. Benjamin Greene was summoned and sewed up the wound.

The season is apparently ten days earlier than last year, and the exceptionally fine weather has kept the farmers very busy, and they have their spring work well in hand. The market gardeners are desirous of a light rain, as the top of the ground is getting quite dry. The dusty roads remind one of drought of summer.

Daily services have been held during Holy Week, in St. Mary's parish, with very good attendance.

The many friends of Mr. William Mayer, of Middletown, are pleased to hear of his gaining so rapidly from his late accident.

Dr. Benjamin Greene is now enjoying as good health as his many friends would wish him to.

JAMESTOWN.

PUBLIC BUSINESS.—At the regular monthly meeting of the Town Council and Court of Probate, held on Monday afternoon at the Town Hall, a full Board was present. No matters came up for probate, but the following business was transacted by the Council: The bonds of Thomas D. Wright Town Sergeant, John E. Watson Town Clerk, and Thomas H. Clarke Town Treasurer, were approved and ordered to be filed. Two hundred and seventy-five dollars were ordered for road repairs and alterations in each of the three districts, and the balance of the \$1000 that was lately voted for road expenditures is held for contingent purposes. The bills allowed were: T. D. Wright, \$21.50; J. E. Watson, \$25.05; Willard B. Peckham, \$14.01; Benjamin E. Hull, \$7.50. Thomas D. Wright was appointed bird and dog constable; W. B. Peckham, Health and Triant Officer; C. E. Congdon and W. H. Knowles, Weighers of Cattle; R. H. Knowles, Inspectors of Oil; and W. H. Clarke, Trial Justice; and Thomas Carr Watson, Coroner. Wm. A. Champlin was drawn grand juror and John J. Watson petit juror for the May term of the Court of Common Pleas that meets in Newport.

BLOCK ISLAND.
Mr. William Pitt Dodge was married on the evening of the 18th, the wedding being private. The friends of the

couple were unable to make any demonstration at the time, but all day Monday, preparations were going on for a ceremony in the evening. The Company of serenaders mustered at the store of C. C. Hall, and proceeded at half past 8 o'clock with music to the Hotel Marlborough, where Mr. Dodge and lady, after stopping temporarily, the welcome and entertainment of the party, which arrived so unexpectedly, was everything that could be desired, and all went home happy by the occasion.

TIVERTON.

Mrs. Mary Cory has been in Cambridgeport this week.

Several schoolboys belonging to the Georges Island school, at "Cape Cod," being baited with herring this week, by Captain Fernando Wilcox started for Seacombe Point on Monday, with his gang of fishermen, for their season of spring fishing.

At the school meeting in District No. 12 on Saturday evening the following officers were chosen: Moderator—Olin A. Gray; Clerk—Samuel E. Almy; Treasurers—George Gray; Treasurer and Collector—Horace Almy.

New England Items.

RHODE ISLAND.

For several years the members of the Seventh-day Baptist Church and Society in Westerly have had in their minds a project to remodel their house of worship, which has stood on Main street since 1838. About one year ago, a committee was appointed to carry out the long-contemplated project; and after many meetings, a plan for the remodeled house stands completed. Last Saturday the house was rededicated, with suitable services, before a large audience.

Pence Dale was the scene of a strike, last week, when 113 weavers in the mill stopped work. Mr. Hazard, manager of the mill, refusing to confer with the strikers unless they returned to work, they did so; and then there was a statement of grievances, and a settlement soon followed. The grievances were, that since the reduction in wages, April 1st, the returns for work were too small, first, because of much delay in consequence of a lack of yarn; and, second, because of excessive fines imposed for defective work. The management declined to change this fines list, and explained that the only way to overcome the lack of yarn was to discharge some weavers, as the other parts of the mill had not the capacity to supply more yarn. The weavers voted to return to work, and thus the strike was ended, and the number of weavers will be reduced. This was the first strike at Pence Dale in thirty-two years, and the second in its history—the former having lasted only twenty minutes.

Mr. William H. Hopkins, of Providence, whose barns at Seekonk were recently burned, has determined to rebuild them on a larger scale, and has already purchased several full-blooded Jersey cows, to begin a herd.

Carter's Little Liver Pills are free from all crude and irritating matter. Concentrated medicine only; very small; very easy to take; no pain; no griping; no purging.
